SARAH NONI METZNER

Biography and Discography (2011)

Currently living and recording a new album in Berlin, this young Canadian had found a good place with producer Markus Lang in The Templeton studios co-creating her 4th record. The sounds are growing hot and juicy. Originally from a little place near Vancouver, her Canadian home is in Toronto, where she recorded 3 previous albums from 2005 in several different styles and genres.

Pulling from her Canadian songwriter roots and her affiliated love of Europe's wild flare for all things musical, Sarah is currently using her tight skills for songwriting, her distinct vocals and her strong musicianship to create a new album that is proving to be an exciting potential on the world market later in 2011.

One can expect a very fresh and alternative fusion of deep minimal electro and acoustic soul, paired with Sarah's signature live sound of looped vocal layers and beat box.

In 2010 Sarah has also begun using her composing skills for creating film scores and is currently writing the full score for the newest feature film by Canadian director Joe Savu.
